

Remote Reading for County:

So I did dictate a County CT today from Keck.

- To open up a new study: You have to go to the order list report tab and manually type in the accession number or even MRN to search for study. You can read directly into Fluency by manually clicking the record button (thanks for finding that out Phil!). I think it's best to dictate in Powerscribe and copy/paste into Fluency. Interestingly, you can't copy/paste from Fluency into Powerscribe.
- You can't have the Synapse powerjacket on a separate screen from Synapse when reading the images (unless you cover-up Fluency). This limitation makes it more difficult to read prior reports.
