

Remote Reading using large monitor (27") with personal or DOR issued laptop:

- Large monitor and laptop will have to be connect using a docking station (i.e. Surface docking port for those with Microsoft surface pro tablets)
- Change display setting to extended display (under mutiple display in Microsoft Windows 10)
- Change Synapse View Settings – Right click on Synapse icon and click on properties. Under Synapse View Settings, set monitor count to 0, Full Screen Count to 1, and Full Screen left X coordinate to 2736
- If above does not work, contact IT 2-4444 and ask for Imaging IT support.
